INTERNSHIPS

- **IBM Skills Build Internship on AI and Cloud** (Jan, 2024 - Feb, 2024) : Participated in an internship program with IBM SkillsBuild, where I was immersed in the practical applications of AI and Cloud technologies.This enriching experience allowed me to delve into IBM's suite of cloud services, including the renowned Watson platform. I gained valuable insights into the field of data analytics.This internship has equipped me with a robust skill set and a deeper understanding of these key areas.

PROJECTS

- **Automating news with Python** (Mar, 2023 - Apr, 2023) : In this project,we have automated our morning news.You can extract those headlines using Python! There's a Python library called Selenium that allows us to automate most websites out there.

- **Facebook Sentiment analysis on Chatgpt** (May, 2023 - June, 2023) : In this project,we have done sentiment analysis of Facebook comments on posts related to ChatGpt and analysed people reviews.Here we used Natural Language Processing and python packages like pandas,Numpy etc.

- **Fake News Detection Website** (July, 2023 - August, 2023) : In this project,we developed a machine learning model that can predict whether a news is Real or Fake.We used natural language processing techniques and machine learning algorithms to detect fake news and also integrated our ML model in a Flask Application.Also used HTML and CSS for website development and deployed it on render.
